The training and placement officer looks after the training and placement activities of Hotel Management & Catering Technology

### **Training:**

We make all efforts to ensure that maximum opportunities from best possible companies are made available for our students for hands on training during internship and to get placed and work with leading hospitality brands within the country and globally in countries like USA, UAE, SINGAPORE, THAILAND, MALAYSIA, etc.

We encourage budding entrepreneurs and nurture future leaders who want to pursue higher studies. In addition to academics, special efforts are taken periodically to build strong leadership qualities and equip students with skill set such as personality development, effective communication, confidence building, handling group discussion and interview as well as corporate etiquettes and manners which help us to achieve 100% placements.

### **Placements:**

As we are the oldest tourism and hospitality institute in the city, our association with the industry goes back to 50 years, hence we are a preferred institute for placements.
